

Jackson Orthopedic Foundation's
Sixth Annual

Canes Film Festival & Gala
Our spooktacular fundraiser!

Saturday, October 28, 4-7 p.m.
Creekside Commons, Lafayette, CA

Event Program

Our most important fundraiser of the year, our Canes event supports our educational programs and helps fund scholarships for students with financial needs.

This year we're also excited to celebrate 25 years of education, research and service to make life better for patients with muscle, bone and joint conditions – and the clinicians who treat them.

We're glad you're here to join us – your participation means we can continue to build on our work providing clinical skills development opportunities to nurses and other healthcare providers, as well as helping college students explore potential health careers.

Thank you – and enjoy the festivities!

Your JOF Board of Directors:

Catherine Matthews, RN-retired, Board Chair

Justin Clark, Co-Founder, Social Change Consulting, JOF Treasurer

Kathleen A. Geier, DNP, Board Secretary

Peter B. Slabaugh, MD, Board Member and Medical Director

**Thanks to our hosting venue,
Creekside Commons**

Silent auction and best costume winners

Closing remarks

Peter B. Slabaugh, MD

JOF is approved by the California Board of Registered Nursing, Provider Number 17398, to provide continuing education.

Education Department, Jackson Orthopedic Foundation is accredited as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.

Why Our Mission Is So Important Now

People are in pain. As many as half of all primary care patients have a common bone, muscle, or joint condition as their principal complaint, and yet, research shows that many clinicians never get adequate training to treat their patients effectively.

JOF is here to help. Our growing variety of courses and workshops provide physicians, nurses, physical and occupational therapists, medical students, and others with the nonsurgical skills and knowledge they need to meet these challenges. We also look to the future, helping college students explore health career options, and conduct research into how we can supplement the orthopedic content provided by universities.

Thanks to supporters like you, we are able to act as the proverbial pebble in the pond: with each clinician we train or student we inspire we can improve the lives of thousands of patients. We encourage you to stay connected with us throughout the year: visit our website at www.jacksonortho.org, subscribe to our blog, and follow us on Facebook, LinkedIn, Instagram, and YouTube.

Your support of Canes funds JOF's flagship education programs:

- **Orthopedic Primary Care (OPC)** – our growing suite of online, in-person and blended-learning courses to help clinicians acquire new skills and confidence treating common bone, muscle and joint conditions.
- **Healthcare Immersion Program (HIP)** – designed to provide college students with a unique, clinical immersion experience in healthcare. The program provides the opportunity to explore various health fields while shadowing experienced providers as they treat patients.

Thanks to your support, JOF is accredited to provide nurses with continuing education across the United States.
